ANNUAL REPORT 2017

Warmth and protection for children in trouble

MARTIN-CLUB 2017

Victoria Fedotova, head of the Board of CSO "MARTIN-club"

Dear friends!

The 2017 year going out. The year that became for us the point of return to normal life. No, the war is not over, and it affects our work and consciousness. But for us - an NGO-refugee, the Dnipropetrovsk region became a native one. We already have a lot of friends and partners in the Dnipro we have learned to orientate in the new community. We managed to overcome the trauma from the loss of the habitual environment and from the survival regime to move to the strategic work mode: to work on de-institutionalization and planned support of biological and foster families, for the development of children and education. This year, most of our clients are residents of the Dnipro and the region. And also - 7 other regions of Ukraine: Donetsk, Lugansk, Sumy, Zaporozhye, Kiev, Poltava and Kharkiv, where the members of our team and partners on children's rights protection and social support of families settled.

Whom we help

Children in a womb, which has no reasonable means to protect them
Children under the age of 18, lacking the capacity to survive, secure family life, housing, adequate food, leading a risky lifestyle, exposed to violence in any form, suffering from loneliness, not having a positive emotional experience
Youth, leading a risky lifestyle, not having shelter, family support
Adults representing the interests of children from the target group
Organization representing the interests of children from the target group
Internally displaced families

MISSSION. VISION

Mission

As a result of our work, children and young people from disadvantaged groups have acquired the capacity to overcome difficulties in their lives and got the necessary support to do this.

Vision

Martin-club helps children and youth in times of crisis, contributes to their social competence, changing their lives for better, thus promotes improvement of society.

They have a roof over their heads, adequate food, get education, development, do not use alcohol, drugs, and do not act destructively on society, acquire positive values. We find ways, technologies, opportunities for providing varied support to clients, who is realizing the need to change their own lives and do not realize this, as well as clients who do not have the intellectual capacity for this awareness.
